# 1. Nevada Office of Traffic Safety (OTS) Mission

## ***Mission***

The mission of the Nevada Office of Traffic Safety is to eliminate deaths and injuries on Nevada's roadways, so everyone arrives home safely.

## ***Program Funding***

Designated by the Governor, the Nevada Department of Public Safety (DPS) is responsible for applying for and administering federal highway safety funds awarded to the State to conduct traffic safety programs that positively affect driving behavior. The Director of the Department serves as the Governor's Representative for Highway Safety and has designated the Administrator of the Office of Traffic Safety as the Highway Safety Coordinator. To accomplish this task, the Department of Public Safety, Office of Traffic Safety (DPS-OTS), along with partners and stakeholders, develops and implements the Nevada Highway Safety Plan (HSP) that identifies critical highway safety issues and problem areas in the State. DPS-OTS works with state, local, and community partners to build programs and to solicit proposals for projects to address identified problems. Funds are awarded to state and local government and non-profit agencies to implement evidence-based traffic safety programs and projects. Programs are also supported using State funds, grants received from private organizations, and FHWA funds passed through from Nevada Department of Transportation, as allowable.

***This report summarizes the planned projects and activities of the FFY 2024 Highway Safety Plan.***

DPS-OTS annually awards federal funds to state, local, and non-profit organizations desiring to partner in solving identified traffic safety problems. Funds awarded are strictly for use in reducing deaths and serious injuries caused by motor vehicle crashes through the implementation of programs or strategies that address driver behavior in the priority problem areas. These program areas, in alignment with the Strategic Highway Safety Plan (SHSP), are:

- Impaired Driving
- Occupant Protection (seat belts and child safety seats)
- Pedestrian Safety
- Traffic Records
- Distracted Driving
- Young Driver/Older Driver Safety
- Speed
- Motorcycle Safety
- Bicycle Safety

## **2. Highway Safety Plan Updates**

No Triennial HSP Updates are proposed for FFY2024.

Advanced crash investigation and reconstruction training for law enforcement strengthens their ability to identify, collect, and report *complete and accurate* crash data to the State, improving the core highway safety databases of crash and citation. The crash training also affords OTS's Traffic Records and FARS team to train officers on the importance of and uses for the crash data that officers collect and how it impacts State

and local analysis of crashes when overlaid with other core databases (e.g. roadway and injury surveillance).
